PROJECTS

Phantom Hacks - Halloween-themed Frontend Website | *HTML, CSS, JavaScript* - Github - Live Deploy
- Phantom Hacks is a website developed during the **frontend-focused virtual coding event** organized by GDG On Campus HETC, sponsored by CatOff. The first season's theme, **Halloween** - *A Haunted Challenge*, was organized to test creativity and coding skills.
- Created and implemented **sleek, responsive, and interactive user interfaces**, delivering an engaging experience for participants and showcasing innovative front-end solutions.
- Developed key features such as **interactive elements, Halloween-themed games**, and **activities**, enhancing user engagement and promoting a fun environment.

MCU Villains Timeline - Interactive Chronological Visualization | *HTML, CSS, jQuery* - Github - Live Deploy
- Developed an **interactive timeline animation** to visually represent chronological events featuring **Marvel Villains in the MCU universe**, enhancing readability and user engagement.
- Implemented **smooth animations** and a **customizable timeline** structure, providing a seamless navigation experience and adaptability for varied use cases.
- Created a **responsive design** compatible with both mobile and desktop platforms, ensuring accessibility across devices. Designed the project to be lightweight and **easily integrable**, enabling users to include it in any web project with minimal setup by customizing the HTML, CSS, and JavaScript files.

ACHIEVEMENTS
